

INVEDION
next dimension of creativity

MAGAZINE CONTENT APP ANDROID

Thank you for your trust and that you decided to purchase this product. We hope that it will meet your expectations and help you realize your goals.

Developing it, we made every effort to make it as simple as possible and intuitive to implement, but if you find that at some point this manual does not contain the answers to your questions, feel free to contact us at: contact@invedion.com

If you find that this product meets your expectations, we will be very grateful for a comment or rating on Envato profile.

Thank you
Invedion Team

ADMIN AREA

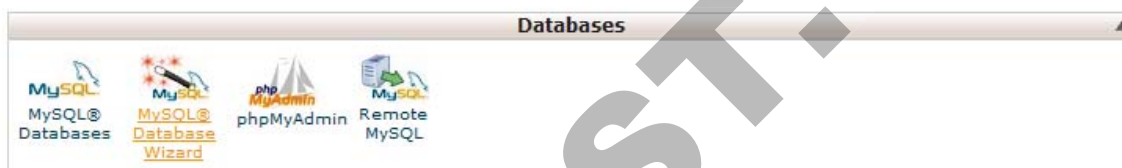

Administration panel installation

Important: All support only by: <http://invedion.com/support/index.php>

1. Create on your server database (use your CPanel or Direct Admin or other).
Step by step video tutorial how to setup database and administration area
(video from 24:45 to 29:53): <https://youtu.be/XJkR6yGw8e4?t=24m45s>

CPanel – How to:

- a) Click on MySQL® Database Wizard

- b) Type the name of the database

A screenshot of the 'MySQL® Database Wizard' interface. It shows 'Step 1: Create A Database'. Under 'New Database:', the text 'yourdatabase' is entered in a text box, followed by a green checkmark icon. Below the text box is a 'Next Step' button. At the bottom, there are links for 'Home', 'Trademarks', 'Help', 'Documentation', and 'Logout'.

- c) Type the user name and password

A screenshot of the 'MySQL® Database Wizard' interface, 'Step 2: Create Database Users:'. It shows the database 'yourdatabase' has been added. The 'Username:' field contains 'name' with a green checkmark. Below it, a note says 'Note: seven characters max'. The 'Password:' field contains seven dots with a green checkmark. The 'Password (Again):' field also contains seven dots with a green checkmark. The 'Strength (why?):' field shows 'Very Strong (100/100)' in a green box. To the right of the strength field is a 'Password Generator' button. At the bottom is a 'Create User' button. At the very bottom, there are links for 'Home', 'Trademarks', 'Help', 'Documentation', and 'Logout', and a link to 'Go Back | Go Back to the Main MySQL Page'.

d) Select ALL PRIVILEGES

MySQL® Database Wizard

Added user " **name** " with password "z/a'!@#\$.

Step 3: Add User to the Database

User: **name**
Database: **yourdatabase**

<input checked="" type="checkbox"/> ALL PRIVILEGES	
<input checked="" type="checkbox"/> ALTER	<input checked="" type="checkbox"/> CREATE
<input checked="" type="checkbox"/> CREATE ROUTINE	<input checked="" type="checkbox"/> CREATE TEMPORARY TABLES
<input checked="" type="checkbox"/> CREATE VIEW	<input checked="" type="checkbox"/> DELETE
<input checked="" type="checkbox"/> DROP	<input checked="" type="checkbox"/> EXECUTE
<input checked="" type="checkbox"/> INDEX	<input checked="" type="checkbox"/> INSERT
<input checked="" type="checkbox"/> LOCK TABLES	<input checked="" type="checkbox"/> REFERENCES
<input checked="" type="checkbox"/> SELECT	<input checked="" type="checkbox"/> SHOW VIEW
<input checked="" type="checkbox"/> TRIGGER	<input checked="" type="checkbox"/> UPDATE

Next Step

2. Go to the phpMyAdmin on your server and import your mca_database/
mca_database.sql or copy content (by open mca_database.txt on any
notepad) to SQL tab (this option is recommended for compatibility reason)
- be sure to select the database before you select a SQL tab.

Run SQL query/queries on server "localhost":

1 Here you paste your database code and click Go button!

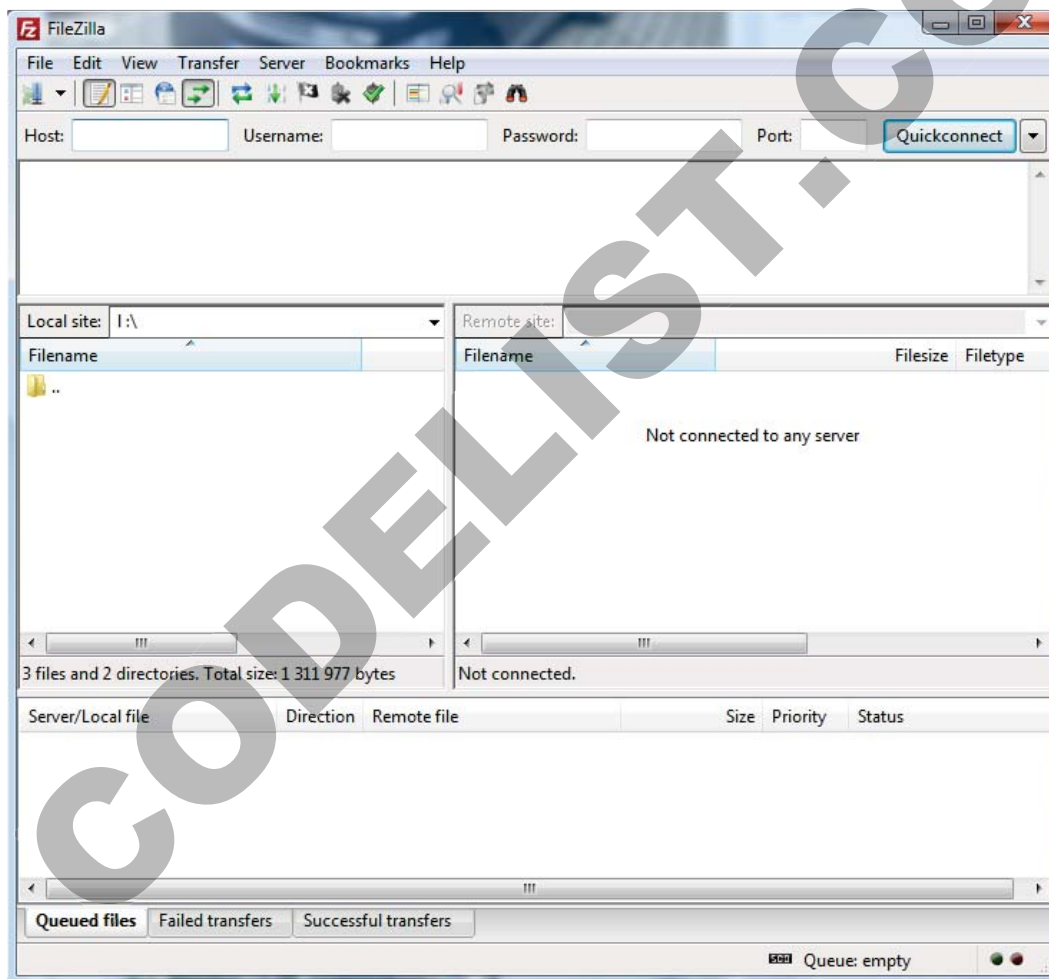

Clear

[Delimiter : ;] ☒ Show this query here again ☐ Retain query box

3. Copy on your server mca_server catalog.

To copy files you can use FTP programs like:

- WinSCP: <https://winscp.net/eng/download.php>
- FileZilla: <https://filezilla-project.org>
- Total Commander: <http://ghisler.com>

Type your host ftp link, username, password and click quick connect. Next go to your public_html catalog and copy/drag from left column to right your mca_server catalog.

4. Edit this file to add your database:

`admin_mca/invedion_connect.php`

5. Edit this lines of code and add your user name, password and database

name (information that you setup in step 1):

`$invedion_lh = 'localhost'; // Your server address, sometimes IP`

`$invedion_user = 'user_name'; // User name`

`$invedion_pass = 'password'; // Password`

`$invedion_database_name = 'database_name'; // Database name`

Information: localhost on some servers is the IP address, that you can find on your phpMyAdmin server information eg. server: Localhost via UNIX socket.

6. After installation you can login to your administration panel:

`http://www.your_domain.com/mca_server/admin_mca/index.php`

Login: `admin`

Pass: `1234` (change it, after first login in settings options)

`your_domain.com` is your real domain name – you put here your domain

Important: If you can't login then your database connection that you setup in step 5 is incorrect:

```
$invedition_lh = 'localhost'; // Your server address, sometimes IP
```

```
$invedition_user = 'user_name'; // User name
```

```
$invedition_pass = 'password'; // Password
```

```
$invedition_database_name = 'database_name'; // Database name
```

```
in admin_mca/invedition_connect.php
```

REGISTER YOUR LICENSE

How to add your product

1. To register your product go to:

<http://invedion.com/support/index.php>

Type your mail, your domain where the product will be installed (this is the http url where you install administration area) and your Item Purchase Code – you will find it in your product zip pack (PDF file). This will give you access to free support, updates, video tutorials, bonus materials and enter to client center (everything in one place).

+"" ,

url: "http://www.your_domain.com/mca_server/search.php?search="+ name
+"" ,

config.xml – to change your app settings (Remember to change it)

App id **com.MagazineContentApp**, version Code and version you change it
when you are upgrading your app:

id = " com.MagazineContentApp " versionCode="1.0.0" version = "1.0.0">

Name is the app name on your mobile device, you can also setup description
and author:

```
<name>Magazine App</name>  
<description>Magazine Content App</description>  
<author href="http://www.invedion.com"  
email="contact@invedion.com">INVEDION</author>
```

Phonegap version you setup/update in base on Phonegap blog:

```
<preference name="phonegap-version" value="cli-6.5.0" />
```

<http://phonegap.com/blog/tag/phonegap-build/>

Android API you setup in:

It is responsible for devices in which you can install your app in Google Play.

```
<preference name="android-maxSdkVersion" value="25" />
```

API 25 = Android 7.1

<https://developer.android.com/guide/topics/manifest/uses-sdk-element.html>

AdMob setup

1. Go to [android-admob](#) catalog
2. Edit plugins/language.js (line 647, 648) and setup AdMob Ad ID

```
banner: 'ca-app-pub-xxxxxxxxxxxx/xxxxxxxxxxxx',  
interstitial: 'ca-app-pub-xxxxxxxxxxxx/xxxxxxxxxxxx'
```

Banner:

To display banner at the bottom of the device you use:

```
AdMob.AD_POSITION.BOTTOM_CENTER
```

To display banner at the top of the device you use:

```
AdMob.AD_POSITION.TOP_CENTER
```

Interstitial:

To display interstitial ads on each page you use this code in language.js (line 662):

```
if(AdMob) AdMob.showInterstitial();
```

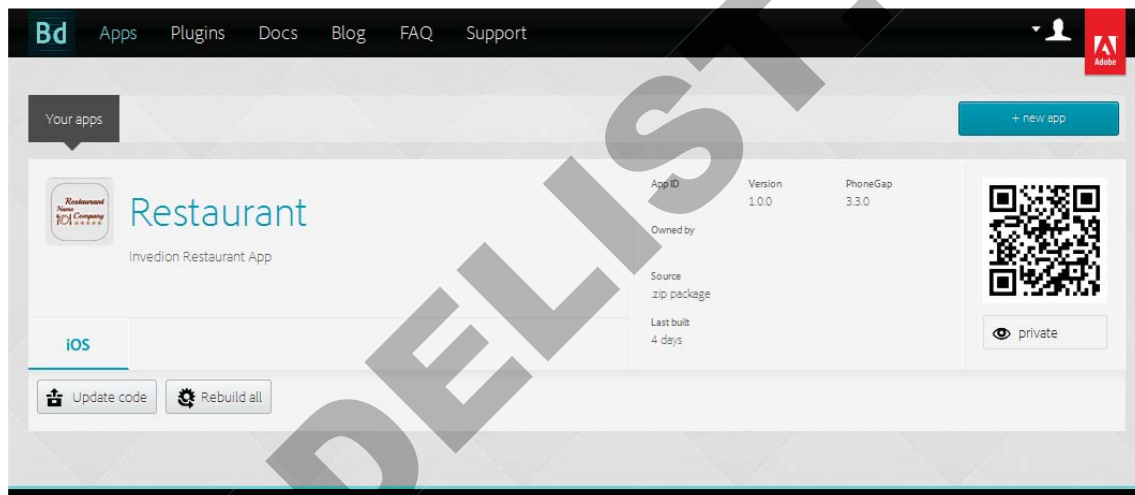

For example if you want display only in index.html then you setup in index.html line 50:

```
setTimeout(function(){ AdMob.showInterstitial(); }, 3000);
```

Important: Sometimes you have to wait to interstitial ad show on because not always Google have this type of ad in your area. If it don't show on = there is no ad to show at this time in your area.

How to generate Android apk file

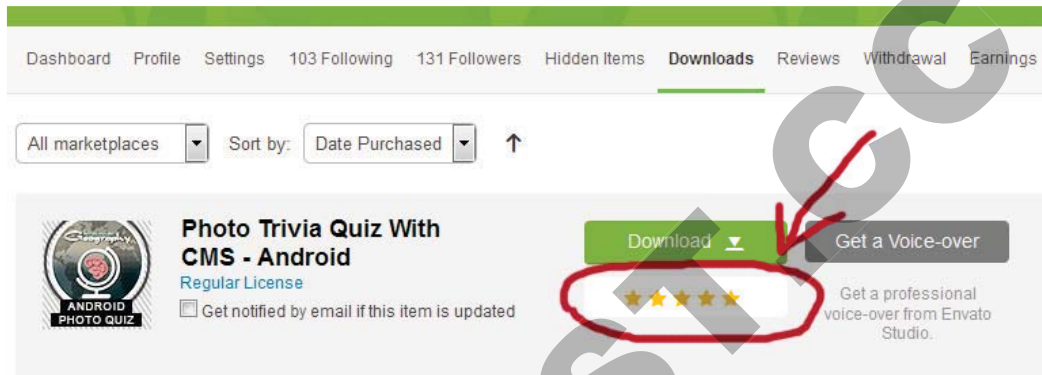

1. Go to <https://build.phonegap.com>
2. Create free private account.
3. Zip your android catalog (it contains the entire project with xml file).
4. Upload (click update code button) this catalog to phonegap (<https://build.phonegap.com/apps>) and wait few seconds.

5. Download your apk (android) installation file. You can use QR code.
6. Now you can install your app on your mobile device or you can upload app to Google Play (then create your key section 7 - disable debugging mode).
7. To disable debugging mode you have to create your own key to sign your app
 - http://docs.build.phonegap.com/en_US/signing_signing-android.md.html#Android%20Signing
 - <http://developer.android.com>

Support / Updates

We would be grateful if you put your opinion/star review about this product that you bought on the <http://codecanyon.net> in your Download Area. Only users who have made the star review will be able benefit from us free updates and advanced technical support. You also have to register your product.

To register your product go to:

<http://invedion.com/support/index.php>

Type your mail, domain and Item Purchase Code – you will find it in your product zip pack (PDF file). This will give you access to free support, updates, video tutorials, bonus materials and enter to client center.

FAQ

QUESTION: I can't login to administration area.

SOLUTION: Your database connection is incorrect. Please correct your data that you type in invedion_connect.php file.

QUESTION: I see some code on screen when I lunch my administration area and I can't login.

SOLUTION: This problem is often on the eastern servers. If you have any problems with setup administration area it always base on your server settings that something is turn off on your server. Very cheap servers are poorly configured and this causes problems for example like this:
